UPCOMING EVENT

Rendez-vous 2019 - Montreal, QC
May 23-26, 2019

CHS NATIONAL AWARDS

The deadline for submitting nominations for the
CHS National Awards is **JANUARY 31, 2019**.

The awards will be presented next May in Montreal at *Rendez-vous 2019*.

For further details about the National Awards Program or to obtain copies of the nomination forms, please visit the **CHS WEBSITE**.

Special call for applications

A special call for applications was put out for two of the CHS research programs for the 2019-2020 grant period.

- The **CHS/Novo Nordisk Psychosocial Research Program** was created to engage professionals/graduate students from the allied health disciplines (ie. nursing, physiotherapy and social work) in research activities addressed to understanding the psychosocial impact of hemophilia and other inherited bleeding disorders and to improve the quality of life of people and families whose lives are affected by these disorders. Letter of intent due by **JANUARY 16, 2019**.
- The **CHS – Bayer – ADVANCE Canada Research Program** was created to engage Canadian hemophilia treaters in activities to identify and research key issues in the ageing hemophilia population. Application forms and support documents due by **FEBRUARY 8, 2019**.

CHS James Kreppner Memorial Scholarship and Bursary Program

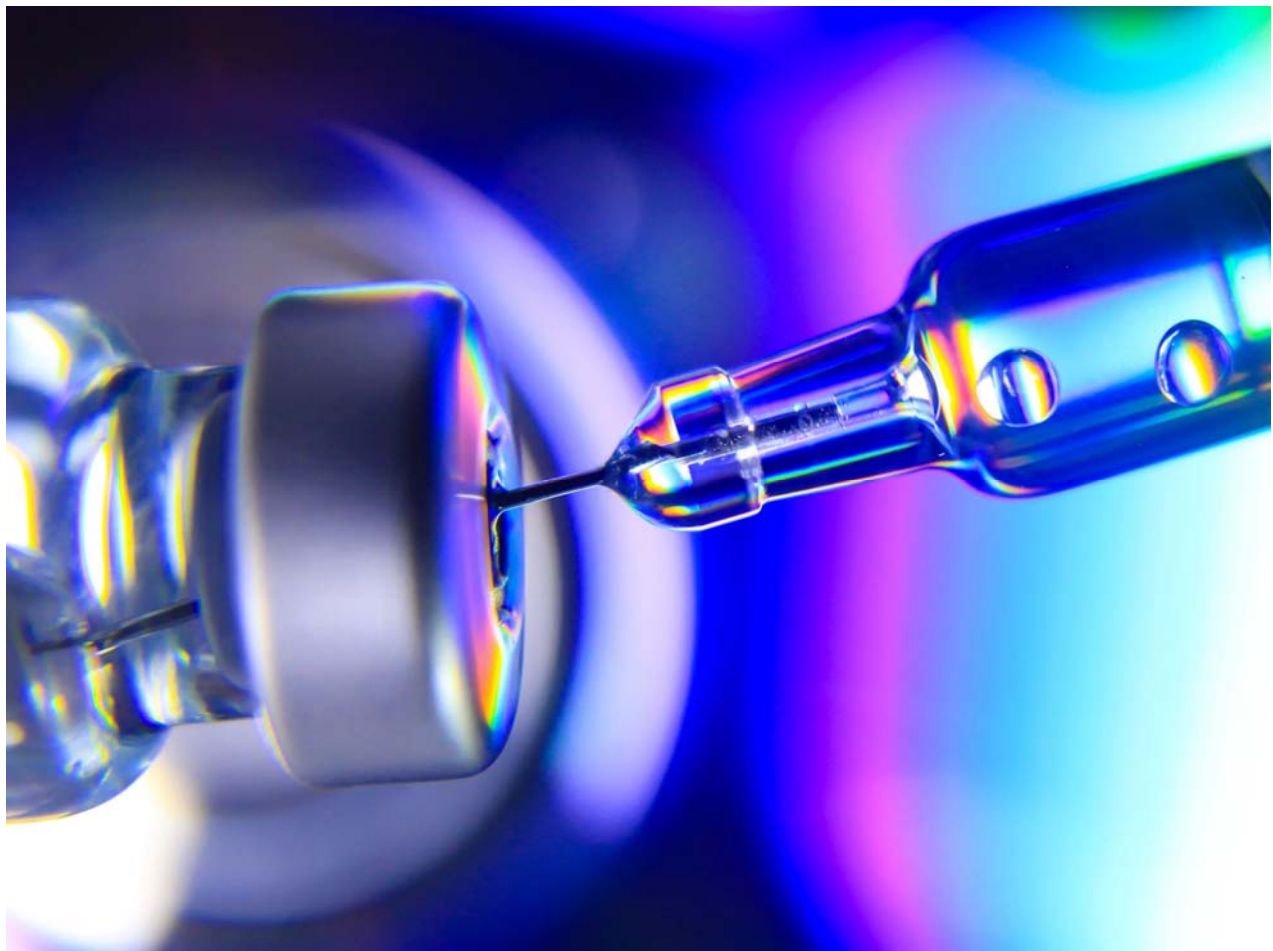

The deadline to submit applications is **April 30, 2019**.

CLICK HERE to access the application forms on the CHS website.

Hemlibra still not available in Canada

The CHS asks members of the Canadian bleeding disorder community for help in getting access to Hemlibra for patients with FVIII inhibitors. Current delays are unacceptable!

CLICK HERE to see how YOU can help.

UNSPEAKABLE

Eight-hour drama miniseries beginning
January 9, 2019, on CBC.

Unspeakable is based on the Canadian tainted blood tragedy, the biggest public health disaster in our country's history. The miniseries chronicles the decades-long saga of two families, each with hemophiliac sons, as they struggle to cope with the impact of AIDS and hepatitis C contracted through contaminated blood.

Products in the pipeline

Updated charts for products in the pipeline are available on the CHS website. The CHS is publishing four charts, one each for clotting factor concentrates, inhibitor products, non-factor coagulation products that may prove efficacious in both inhibitor and non-inhibitor patients, and gene therapy, in order to help everyone stay informed of their progress through clinical trials and regulatory approval.

CLICK HERE to access the charts.

New research and market studies - recruitment

On a regular basis, the CHS invites the bleeding disorder community to participate in research and market studies. These studies are crucial to the advancement of care and treatment and often help move one step closer towards a better quality of life. These studies, however, need our community to gather sufficient data to be relevant.

Please take the time to see what is presently happening with regards to research and market studies and to see if you could take an active part in them.
